

Money Manager

iOS Mobile Application Project

Submitted by -

Satyam Pramod Gajjar

Rutvik Bhoj

Urvish Shabhaya

Sahil Mehta

Our application features

- Let user record day to day transactions in a simple and interactive way.
- User can see their spending habits in an interactive Pie chart.
- User can update their personal information in Settings page.
- User can update their profile photo in settings page.

Technologies used

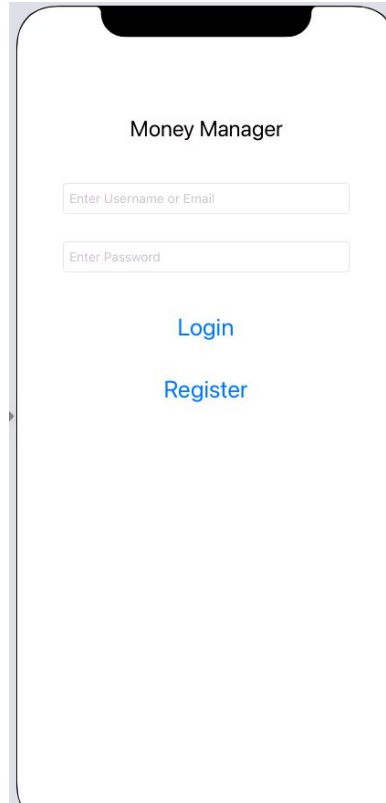

- Firebase - We have used firebase to save our user registration, their transaction and to store their profile image
- TabBarController - We have used TabBarController to switch between different viewcontrollers and provide functionality to the user
- UIImagePickerControllerController - We have used UIImagePickerControllerController to give user ability to upload their image in the application
- GitHub - We are using Github version control system to work collaboratively on our project.

Roles and Responsibilities

Rutvik

Login, SignUp and Forgot Password

- Rutvik has designed and developed this page, used firebase to authenticate user using his email and password
- Also made forgot password page, so user can reset his password
- Also adding loading icon on the pages while the page is loading
